## WHO WE ARE

We are two friends grown up with the passion for food and fishing.

We wanted to create something new in our territory, a business in line with our ideals of quality and sustainability.

We therefore funded the first fish smoking activity in Aosta Valley.

## WHAT WE DO

We are a fish smokers.

We source our high quality fish in several small farms of Piedmont and Aosta Valley.

All our fish grows up in freshwater from the Italian Alps which, due to its cold temperature, gives low fat and high Omega 3 content.

## HOW WE WORK

The quality of our products is guaranteed by the best fish, grown slowly in the mountains and without antibiotics.

If in intensive farming it takes 6 months for a fish to reach the size of 1kg, in our farms the period is extended up to 18 months.

All our processes are carried out by hand, selecting only the best fillets.

## WHY TROUT?

Trout is an excellent source of protein, niacin, vitamin B12, and Omega 3.

They are 50% less fatty than salmon with a comparable amount of protein.

The trend is clear, unsustainability of intensive fishing and sea pollution are orienting customers toward freshwater fish, which is more local and natural.

# OUR PRODUCTS: SALMON TROUT

Cold smoked salmon trout with alpine herbs

Pre-sliced cold smoked salmon trout

Cold smoked salmon trout

Cold smoked salmon trout tartare

Hot smoked salmon trout

# OUR PRODUCTS: RAINBOW TROUT, BROOK TROUT & LAVARET
